Riddle me this, riddle me that

IT'S TIME TO PUT ON YOUR THINKING CAP

Here is a very well-known riddle adapted to the aviation world. Five pilots are having a stop-over at an airport. On the apron, their aircraft are parked in a line from left to right, from A1 to A5. Each aircraft is of a different type. They have all planned different destinations and have checked the ATIS at their respective airfields. No two pilots have one thing in common...

The question is ... WHO WILL BE LANDING ON RUNWAY 09?
First, listen to the ATIS recordings on www.anglais-pour-voler.com and note down the elements just as you would in an actual flight. The different ATIS have been edited to avoid giving away too many indications. Then fill in the grid with the help of these elements and the 15 clues below.

	A1	A2	A3	A4	A5
Registration					
Type					
Destination					
Runway in use					
Present weather or Airfield information					

- 1 - G-DAYS is a Europa.
- 2 - G-SSCA will be landing on runway 27.
- 3 - G-RWST's planned destination has few clouds at 2200 feet.
- 4 - The BE58 is parked to the immediate left side of the DA42.
- 5 - Visibility at the BE58's arrival airfield is 10 kms or more.
- 6 - The pilot who will be landing on runway 36 will do so in haze.
- 7 - The Robin will be landing in mist.
- 8 - The aircraft parked at the centre is going to the airfield where the wind varies between 310° and 030°.
- 9 - G-BZIJ is parked on A1.

- 10 - The pilot who will have to worry about the Danger area 141 is parked next to the one who will be landing on runway 06.
- 11 - The pilot who will be landing on runway 21 is parked next to the one who will be landing in mist.
- 12 - Find out the present weather at EGPA.
- 13 - NOSIG is expected at N 678J's field of destination.
- 14 - G-BZIJ is parked next to a C172.
- 15 - The pilot who will have to worry about the Danger area 141 is parked next to the one who will be flying to the airport with a transition level of 50.
