

Unusual situation

Une dizaine de minutes après le décollage pour un vol local le long de la côte, un de mes passagers m'a dit qu'il ne se sentait pas bien. J'ai décidé de retourner vers le terrain et, comme ce passager semblait avoir des douleurs dans la poitrine, j'ai demandé une assistance médicale à l'arrivée.

2 additional questions:

- Had your passenger shown any sign of discomfort before the flight?
- What other medical issues could you be facing during a flight?

About 10 minutes after take-off for a local flight along the coast, one of my passengers told me he was not feeling well. I decided to go back to the field and, as this passenger seemed to be experiencing chest pains, I requested a medical assistance on arrival.

- Had your passenger shown any sign of discomfort before the flight?

My passenger looked a bit tired and anxious, but nothing out of the ordinary.

- What other medical issues could you be facing during a flight?

air-sickness, a fainting passenger, an epileptic fit, a rash, a bleeding nose, hypoxia ...
